GO_BP: core−enrichment
skeletal muscle contraction
muscle contraction
proton motive force−driven mitochondrial ATP synthesis
aerobic electron transport chain
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
proton motive force−driven ATP synthesis
aerobic respiration
cellular respiration
proton transmembrane transport
respiratory electron transport chain
energy derivation by oxidation of organic compounds
electron transport chain
oxidative phosphorylation
mitochondrial gene expression
generation of precursor metabolites and energy
mitochondrion organization
mitochondrial translation
mitochondrial respiratory chain complex assembly
protein modification by small protein conjugation
protein modification by small protein conjugation or removal
post−translational protein modification
purine−containing compound biosynthetic process
nucleoside phosphate biosynthetic process
proteasome−mediated ubiquitin−dependent protein catabolic...
protein modification process
modification−dependent protein catabolic process
modification−dependent macromolecule catabolic process
ubiquitin−dependent protein catabolic process
proteasomal protein catabolic process
