GO_MF: core−enrichment c
calcium ion transmembrane transporter activity
calcium channel regulator activity
NADH dehydrogenase (ubiquinone) activity
iron−sulfur cluster binding
oxidoreduction−driven active transmembrane transporter ac...
active transmembrane transporter activity
oxidoreductase activity, acting on NAD(P)H
proton transmembrane transporter activity
metal ion transmembrane transporter activity
ligase activity
electron transfer activity
NAD binding
adenyl nucleotide binding
ubiquitin protein ligase activity
ligase activity, forming carbon−oxygen bonds
aminoacyl−tRNA ligase activity
catalytic activity, acting on a tRNA
ubiquitin−protein transferase activity
transcription coregulator activity
transcription regulator activity
transferase activity
