KEGG: core−enrichment overlap
Osteoclast differentiation
Viral myocarditis
Arrhythmogenic right ventricular cardiomyopathy
2−Oxocarboxylic acid metabolism
Dilated cardiomyopathy
Citrate cycle (TCA cycle)
Hypertrophic cardiomyopathy
Calcium signaling pathway
Carbon metabolism
Oxidative phosphorylation
Non−alcoholic fatty liver disease
Thermogenesis
Proteasome
Oxytocin signaling pathway
Diabetic cardiomyopathy
Chemical carcinogenesis − reactive oxygen species
Parkinson disease
Aminoacyl−tRNA biosynthesis
