GO_BP: top 20 pathways per contrast
mitochondrial gene expression
mitochondrial translation
proton motive force−driven ATP synthesis
proton transmembrane transport
oxidative phosphorylation
proton motive force−driven mitochondrial ATP synthesis
cellular respiration
respiratory electron transport chain
electron transport chain
energy derivation by oxidation of organic compounds
aerobic respiration
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
generation of precursor metabolites and energy
aerobic electron transport chain
mitochondrial respiratory chain complex assembly
mitochondrion organization
carboxylic acid metabolic process
oxoacid metabolic process
striated muscle cell development
muscle system process
muscle structure development
modification−dependent macromolecule catabolic process
modification−dependent protein catabolic process
ubiquitin−dependent protein catabolic process
proteasome−mediated ubiquitin−dependent protein catabolic...
muscle contraction
muscle organ development
