GO_MF: top 20 pathways per contrast
oxidoreduction−driven active transmembrane transporter ac...
proton transmembrane transporter activity
NADH dehydrogenase (ubiquinone) activity
electron transfer activity
catalytic activity, acting on a tRNA
ligase activity
ligase activity, forming carbon−oxygen bonds
aminoacyl−tRNA ligase activity
oxidoreductase activity, acting on NAD(P)H
NAD binding
active transmembrane transporter activity
active monoatomic ion transmembrane transporter activity
primary active transmembrane transporter activity
monoatomic ion transmembrane transporter activity
inorganic cation transmembrane transporter activity
structural constituent of ribosome
inorganic molecular entity transmembrane transporter acti...
transmembrane transporter activity
oxidoreductase activity
cytoskeletal protein binding
actinin binding
transporter regulator activity
ubiquitin−like protein peptidase activity
ubiquitin−like protein binding
structural constituent of muscle
ubiquitin binding
calcium channel regulator activity
metal ion transmembrane transporter activity
calcium ion transmembrane transporter activity
