

A

Set score against dispersion

B

Score distribution by study group

S12 Figure. singscore across the cohort. (A) One point per set, 1990 sets, score and dispersion averaged over 131 samples. Dispersion is the spread of a set's member ranks within a sample: low means members sit together. (B) Every set in every sample, pooled within study group; the box is the interquartile range. Data: set_scores sheet of 04_run_singscore.xlsx.
