

S12 Figure. Pre to post, BFR, Hallmark. ROC curves for all 3 Hallmark sets whose singscore separates the groups at nominal p, across 32 paired legs, smallest p first. AUC has its direction fixed: red separates higher in post, blue lower. Shading is area under the curve, dashed line chance. p from the paired Wilcoxon signed-rank test, q from BH within collection and task. Nominal p, uncorrected: chance alone returns 2.1 of the 41 Hallmark sets. Data: set\_auc sheet of 05\_set\_classification.xlsx.

S13 Figure. Pre to post, HLRT, Hallmark. ROC curves for all 10 Hallmark sets whose singscore separates the groups at nominal p, across 33 paired legs, smallest p first. AUC has its direction fixed: red separates higher in post, blue lower. Shading is area under the curve, dashed line chance. p from the paired Wilcoxon signed-rank test, q from BH within collection and task. Nominal p, uncorrected: chance alone returns 2.1 of the 41 Hallmark sets. Data: set\_auc sheet of 05\_set\_classification.xlsx.

S14 Figure. Post BFR vs HLRT, Hallmark. ROC curves for all 2 Hallmark sets whose singscore separates the groups at nominal p, across 32 paired participants, smallest p first. AUC has its direction fixed: red separates higher in BFR, blue lower. Shading is area under the curve, dashed line chance. p from the paired Wilcoxon signed-rank test, q from BH within collection and task. Nominal p, uncorrected: chance alone returns 2.1 of the 41 Hallmark sets. Data: set\_auc sheet of 05\_set\_classification.xlsx.

S15 Figure. Change, BFR vs HLRT, Hallmark. ROC curves for all 2 Hallmark sets whose singscore separates the groups at nominal p, across 32 paired participants, smallest p first. AUC has its direction fixed: red separates higher in BFR, blue lower. Shading is area under the curve, dashed line chance. p from the paired Wilcoxon signed-rank test, q from BH within collection and task. Nominal p, uncorrected: chance alone returns 2.1 of the 41 Hallmark sets. Data: set\_auc sheet of 05\_set\_classification.xlsx.
